

Important information

After (seasonal) use, make sure the Fairybell® is completely dry. Lay the Fairybell® out on the ground and tie the orange ribbons around various sections of the Fairybell® (straps with lights) so that next season you start with an untangled Fairybell®.

When placing the Fairybell® back into the box, hold the top hook and lower the bottom part (plugs and elastics) first into the box and finish on top with the hook.

Always store the Fairybell® in a clean and dry place.

Lower the Fairybell® at windforce 6 or higher.

Missing parts or defects

All spare parts can be ordered at our webshop.

See 'service request' at our webshop.
